OPERATION DESCRIBED.

During the morning's examination of the patient, the doctors, after a thor-ough sounding, found that a pulmonary sound had reappeared in the obtuse zone, except in the area limited to the region where the puncture was made for the extraction of the liquid, which

some miracle was being wrought concerning the pope's condition."

Prof. Rossoni said that the state of

the pontiff was very serious. There was little danger of an immediate climax, although it was constantly present. The pope was making a brave

struggle, but, the doctor continued, "his weapons of defense are weak. Even the finest tempered sfeel becomes blunt-

ed after so many years of use. A re-newal of the pleuric phenomena is al-

ways dangerous, even in a young strong organism. Therefore, how much

more dangerous is it in an old. For-tunately, there are only a few more

serious complications. The defective respiration has had a bad influence on

the circulation and we find an alarming depression in the heart's action. Perhaps this second withdrawal of the

liquid deposit may restore the circula-tion, but the great question is, 'Can this relief be sufficient and permanent?'

Unfortunately, there are many rea-

Rome, July 10, 3:45 p. m.-The pope's marvelous vitality still permits him to maintain his struggle against death, although a portion of the night was passed in sleepless waiting. He greeted his doctors this morning with hopeful expressions. It was decided to perform another operation, which was executed by Dr. Mazzoni, assisted by Dr. Lapponi. The patient was visibly relieved and soon after arose and sat In his arm chair and read his favorite Latin poet, Horace. The usual light the pope then laid down for a long rest. Although there is intense public anxlety, the neighborhood of the vatican

and St. Peter's is comparatively quiet. The vicar of Rome has issued a proccovery of his holiness and caused it to be posted on the front of all the churches, which throughout the day have been crowded with praying men and women. POPE ROSE EARLY.

The pope rose at 6 o'clock this morntrg. He said he thought the air of his toom was somewhat vitiated and wanted it changed. An attendant, Plo Censo by Dr. Lapponi, opened the windows of the whole apartment, including that of the sick room, the pontiff having previously been carefuly covered with extra blankets. After remaining open for a short time, the windows were closed, with the exception of the window in the sick room, Dr. Lapponi having decided that the balmy, fresh air could only do the patient good. The opening and the shutting of the windows was watched from the plazza by the people who had gathered there to hear the latest news, and some of them interpreted it as meaning that the pontiff was dead, which necessitated a prompt official de-

THE POPE PRAYED.

The pope prayed for half an hour and then had breakfast, partaking of the yolk of an egg beaten up with sugar, hot coffee and a light biscuit. The monsignor added that the pontiff referred to several different matters, recalling especially the most minute details and rememberng facts, figures and dates with mar velous promptness, and all this to the accompaniment of snuff taking.

The same impressions were formed by Count Camille Pecci, who visited the

ITALY AND NEXT CONCLAVE.

Premier Zanardelli Confers With Minister of Justice About Eventual Right of Veto Which Italian Government Might Exercise--Spain, France and Austria Have Same Right.

Zanardelli had a long conference today with the minister of justice, Signor Coccu-Ortu, under whose jurisdiction are all religious affairs in Italy, about the eventual right of veto which the Italian government might exercise at the next conclave. Three Catholic powers, Spain, France and Austria, enjoy this privilege, termed the "right of exclusion," which entitles them to veto the election of a candidate who is non persona grata to their governments. In such a case a power which may desire to prevent the election of a certain candidate deputes a cardinal of its nationality to announce the objection at the conclave, but the announce-ment must be made while the scurtiny is going on, before the candidate has received the majority of votes requir-ed to elect, otherwise the protest would be invalid. This right has been re-garded as extremely important, expecgarded as extremely important, especially in the middle ages, when Italy, being the largest field of action, for France, Austria and Spain the choice of a pentiff was a question of supreme

Rome, July 10, 9:30 p. m .- Premier , joyed the right, but Italy did not exercise it in the last conclave and may perhaps, find it difficult to do so now as no lialian cardinal, even among those who are most conciliatory would undertake to represent united Italy, which is considered by the church to have usurped the temporal sovereignty of the papacy. Besides, Italy's policy consists in considering the papacy to be merely a spiritual law, complete liberty and independence, ercise its ministry in Rome, the capi tal of the kingdom.
